
The team representing our country at the International Youth Innovations Competition (BIEA 2020) held in the United Kingdom has succeeded.

The team of Azerbaijan was among 12 teams taking part in the finals. Students of the Lyceum named after the academician Zarifa Aliyeva under the Ministry of Education Ruslan Bayramov, Elvin Bilalov and Suleyman Ismayilov were selected as the best in the "Best Effort Award" nomination.

This year's theme of the competition held in London from 2019 is called "Let's protect the coasts." The device developed by our students to clean water and land from plastic wastes was highly appreciated by foreign experts.

Information about the achievements of our students has also been published in foreign media (foreign media).
