

---

The trainings will start since early 2014. Competition-based selection of participants is planned to be completed by the end of this year.

The main project objective is to improve the management capacity and skills of training participants. Along with the school principals, other persons with pedagogical practice may take part in the trainings. The trainings will cover the subjects such as school, curriculum and management, people being educated and management, educators and management, finance and accountancy basis, data collection and analysis, development of reports and legal basis of school management. The trainings to be organized on the basis of various modules will be ongoing 10-12 weeks.

It's planned to involve the people achieved the success certificate in the end of the training to different pilot projects in secondary education entities. Such pilot projects will cover the reforms regarding the transition to management, application of financing mechanism per pupil, arrangement of school communities and others.

The mentioned event include the provision of transparency in the education management envisaged in the "State Strategy for Development of Education in the Republic of Azerbaijan", improvement of responsibility in the education results, achieving the school leadership qualification, application of result-oriented management and other state of art management technologies to the process.

Information on the training content and appeal instructions for participation will be given to publicity in the near future.
