The Resource Centre, given to use within the Modern Azerbaijan Professionals Project by the support of the Ministry of Education and Republic of Belarus, aims to improve the engaging level of the youth to primary vocational education institutes and improve the quality of personnel training.

The Ministry of Education carried out the substantial repairing of the facility in which the Resource Centre is based and supplying with modern equipment. Construction area, especially environment meeting state-of-art requirements for qualified personnel training on welding technologies have been provided. Moreover, training was provided for masters in the Belarus Vocational Education Institute within the cooperation with the Government of Republic of Belarus.

In general, various reforms aim to provide the compliance with state-of-art requirements for primary vocational education institutes. The outcomes of implemented pilot projects are planned to be applied to the other vocational schools as a model.

It's to note that within the Modern Azerbaijan Professionals Project implemented by the Ministry of Education it's considered to enhance the scope of vocational education system, quality improvement of the personnel training process and establishment of modern pilot education complexes.
