

---

Akif Alizade, the president of the ANAS, Mikayil Jabbarov, Minister of Education of the Republic of Azerbaijan, Ogtay Shiraliyev, Minister of Health of the Republic of Azerbaijan, Ahliman Amiraslanov, rector of Azerbaijan Medical University, government officials, deputies, scientists and family members of deceased academician were participating at the event.

Firstly, the participants put flower bunches on the academician's grave in the Alley of Honors and paid tribute to his memory.

Then exposition of books, magazines and other publications reflecting remarkable academician's life and creations have been demonstrated.

ANAS president Akif Alizade with the opening speech gave information on multiple activities embracing personality, scientific, educational – organizational, pedagogical and medical – theoretical directions of M. Mirgasimov, famous public figure, first Azerbaijani scientist – surgeon, honored scientist, academician.

Ogtay Shiraliyev, the Minister of Health of the Republic of Azerbaijan, talked about academician M. Mirgasimov's activities in the development of medical science.

The Minister of Education of the Republic of Azerbaijan, Mikayil Jabbarov greeted the participants. The Minister noted ANAS first president, first Azerbaijani scientist – surgeon and honored scientist Mirasadulla Mirgasimov's anniversary event was one of the portentous events of the country's scientific – educational history.

The Minister of Education stated that event was overlapping with the other portentous one. The Minister mentioned voicing the thesis "Let's transform black gold to human gold" in the World Summit on Information Society held in Geneva 10 years ago, Azerbaijan President Ilham Aliyev declared the new development phase of country economics. These were new challenges of education and sciences as well.

The Minister stated M. Mirgasimov's life was dedicated to the unity of national – moral – ethical values and nationwide ideals: "XX century was the development line of Azerbaijani national renaissance. Gallery of national renaissance includes Uzeyir Hajibeyov, Yusif Mammadaliyev, Samed Vurgun, Mustafa Topchubashov, Mirasadulla Mirgasimov, Heydar Huseynov, Mirza Ibrahimov, Mirali Gashgay. These persons were creators of the National Academy, one of national symbols of Azerbaijan.

Stressing that the academician was also an honored teacher, the Minister of Education noted he was both student and first doctor of sciences of the first university of Azerbaijan established in 1919.

The Minister noted we should be prepared for emerging global transformations with the education and science collaboration. This collaboration was inherited by science-education patriots like academician Mirgasimov. Today community of knowledge is one of key goals of Azerbaijan education and science. These goals have been described in the "State Strategy for the Development of Education in the Republic of Azerbaijan". We guess transformation of higher education facilities to educational – research – innovation centers will contribute to the unity of education and science.

The Minister of Education told we see future considering honored history of Azerbaijan education and science. Author of most "firsts" in Azerbaijan history, academician M. Mirgasimov was one of the first specialized teachers of Azerbaijan as well. As told by our nationwide leader Heydar Aliyev, this is the highest rank. His father was also a teacher, as himself and his children.

Rector of the Azerbaijan Medical University, Ahliman Amiraslanov talked about honored scientist's scientific activities and high organizational skills.

Academics Ismayil Ibrahimov, Boyukkishi Agayev and Vasim Mammadaliyev told their memories about M. Mirgasimov and his high humane qualifications.

---

At the end academician M. Mirgasimov's son, professor Ogtay Mirgasimov expressed his gratitude to the organizers.

After the event a new memorial plaque was opened in the building in which M. Mirgasimov was living.
