

---

It serves the purposes for conformity of material-technical base of the initial professional educational institutions operating in corresponding branch in accordance with modern requirements, improving the effectiveness of the training on preparation of experts.

It should be noted, that since independence, our country has launched a similar initiative. These cars of manufacture Europe provided for training, are equipped by the engine 1600 cub/cm and 5 -a step mechanical transmission. Cars both from the point of view of management, and from the point of view of safety meet the European standards.

Acquisition of cars for initial professionally technical educational institutions, will create positive conditions for enhancing the effectiveness of the training.
