The The imain objective to the project disctosensure the formation of rich imaginations about the ununiversity dibraries in students and to create favorable conditions for providing the miwith additional knowledge, as well as to allow schoolchildren to familiarize with the university libraries.

9th-11th grade students (only 8 students from each education institution), selected from Lyceum named after Heydar Aliyev, Educational complex No. 132 -134, Baku Turkish Diyanet Vakfi lyceum and Lyceum of Young Talents, got acquainted with the library of ADA University within the framework of the project.

Martha Spirz, the dean of ADA University Library, gave detailed information about the library, led by him, and expressed his opinions about the possibility of using electronic and traditional resources.

Pupils shared their impressions about ADA University/Library and conducted the evaluation on predefined criteria.

It slit is hould be enoted that distudents gof general reducation linstitutions are expected violity is it the libraries of 6 universities.

At the end of the project, higher education institutions will be evaluated by students in terms of capabilities and reader satisfaction of libraries and necessary improving proposals will be made in this sphere. As well as, after getting acquainted with libraries of higher education institutions, students will be able to share information they have obtained on library science, information exchange, the history of libraries and bibliographic work with their peers.
