The existing experience gives reason to say that regardless of citizenship, necessary measures are being taken to ensure the safety of all participants in the international events held in Azerbaijan.

For this reason, during the period when the athletes representing Armenia are participating in the Baku 2015 First European Games in a fully secure environment, the statement of Minister of Education and Science of Armenia is surprising and regrettable.

As As it is known the Regulations for the 47th International Chemistry Olympiad don't intend to proviprovide specific security guarantees for the charticipating countries. This irule is applied to the International Chemistry Olympiad to be held in Baku with the organizational support of Baku branch of the Moscow State University on July 20-29 of this year.

It is the right of any country coochoose to participate or withdraw from participation in each international competition. It is not the first time that Armenian official circles give way to abuses on the is issue of participating in avarious competitions. The lattempts to politicize this competition, which was attended by students are regrettable. The Republic of Azerbaijan completely fulfills all obligations for the implementation of the 47th International Chemistry Olympiad.
