Training sessions have been conducted at general education institutions under TOPs (creation of modern educational technology in physical education), a joint project of the Ministry of Education, British Council, Azerbaijan State Physical Culture and Sport Academy, and Sport for Development Public Union.

The aim of the project is to equip physical education teachers with new skills on modern educational technologies in physical education and to create advantageous environment for the development of learners' physical skills by creating opportunities for the protection of their physical and psychological health conditions at secondary schools.

First training sessions under the project were conducted at secondary schools No.95 and No.2238 in Baku. 150 teachers representing 72 general education schools in Baku and Sumgayit took part in the three-day professional training sessions on TOPs methodology.

The training sessions featured discussions on the content of physical education subject, and practical studies using modern methodology. Teachers also received information on the guidelines on the usage of TOP Oyun methodological education cards.

In order to evaluate the outcomes of the project, initial and final evaluation was conducted among the teachers and students by the Sport for Development Public Union.
